14 FL OZ (414ml)

Introducing **TUNDRA™ Fire Extinguishing Spray** from **First Alert®**

What is it?

- A fire extinguishing spray that is more effective than a traditional fire extinguisher on most common fires.

What makes it unique?

- Easy to use can and spray nozzle design is intuitive to use.
- 4X greater discharge time vs. traditional fire extinguishers allows more time to fight the fire.
- Easy clean-up, biodegradable. Won't damage stove and counter surfaces like a traditional ABC fire extinguisher. Simply wipe area with damp cloth.

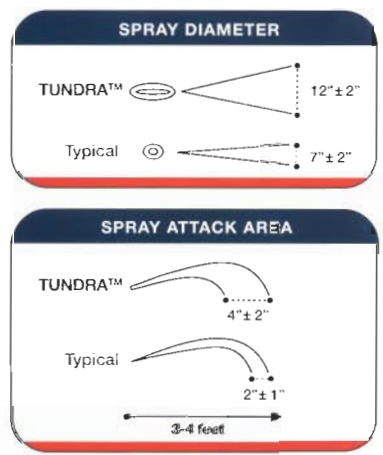

No Hazmat Shipping Fees!

Proprietary Wide-Spray Nozzle

A first in the industry. The wide-spray pattern allows the agent to more effectively fight a greater surface area of the fire at once – 3x greater than a typical actuator.

4 x Longer

The discharge time is up to 4x longer than traditional fire extinguishers allowing the user more time to fight the fire.

Inside the Product

An internal pouch isolates the contents from the pressure. When the spray-nozzle is pressed, only the contents are released and the propellant stays inside the can so the fire is not agitated.

Tundra is effective on:

Common Household Fires
TUNDRA™ Fire Extinguishing Spray is able to extinguish common fires such as fabrics, paper, and wood.

Cooking Oil Fires
TUNDRA™ Fire Extinguishing Spray is unique in that it is able to extinguish cooking oil fires. The liquid contents create a barrier or "blanket" that rapidly extinguishes the fire.

Fires Involving Electrical Equipment
TUNDRA™ Fire Extinguishing Spray is effective to use on fires involving electrical equipment of 110/220 volts (e.g. a fire started by a toaster). Independent testing has shown the spray pattern is not electrically conductive at 35,000 volts, even from 10 inches.

Great for
Kitchen • Garage • Office • Dorm • Camping • Grilling • Boat • RV • Fireplace • Car • Workshop
