INTRODUCTION

SAFETY TIPS

1. Always have working Smoke and Carbon Monoxide Alarms in your home.

2. Do NOT disable the alarm.

3. Check your Smoke and Carbon Monoxide Alarms regularly.

4. Install a Smoke and Carbon Monoxide Alarm on every level of your home.

5. Smoke and Carbon Monoxide Alarms should be installed outside sleeping areas.

6. If you have central heating, make sure the alarm is not too close to the boiler or central heating unit.

7. Do NOT cover the Smoke and Carbon Monoxide Alarms with anything.

8. Smoke and Carbon Monoxide Alarms should be replaced every five years.

10. Use only batteries recommended by the manufacturer.

BASIC SAFETY INFORMATION

IMPORTANT: Smoke and Carbon Monoxide Alarms only warn you of a potentially dangerous situation that requires your immediate attention. Smoke and Carbon Monoxide Alarms do not tell you what the danger is or how to deal with it.

1. Always follow safety warnings and instructions that come with your Smoke and Carbon Monoxide Alarms.

2. Do NOT install this unit over an electrical junction box. Air movement near an electrical junction box may activate the alarm.

3. Keep the Smoke and Carbon Monoxide Alarms away from the bathroom and kitchen exhaust fans.

4. Keep the Smoke and Carbon Monoxide Alarms away from cooking appliances, and fireplaces. Smoke and Carbon Monoxide Alarms are intended for use in homes and mobile homes, not in commercial or industrial buildings.

5. Smoke and Carbon Monoxide Alarms should NOT be used in public buildings, hotels, or schools.

6. Smoke and Carbon Monoxide Alarms should be installed in outdoor areas, such as garages, porches, and patios.

7. Smoke and Carbon Monoxide Alarms should NOT be installed in areas that receive direct sunlight, such as windows or skylights.

8. Smoke and Carbon Monoxide Alarms should be installed in areas that receive strong drafts, such as near doors or windows.

9. Smoke and Carbon Monoxide Alarms should be installed at least 10 feet (3 meters) away from any source of smoke or steam.

10. Smoke and Carbon Monoxide Alarms should be installed at least 6 inches (15.2 centimeters) above the floor and at least 6 inches (15.2 centimeters) below the ceiling.

IN CASE OF EMERGENCY

1. Call 911 immediately.

2. If you have a Smoke and Carbon Monoxide Alarm, you will be alerted immediately.

3. Do NOT attempt to put out the fire yourself.

4. Follow the instructions in the Smoke and Carbon Monoxide Alarm manual.

5. Do NOT attempt to move a Smoke and Carbon Monoxide Alarm that is on fire.

6. Do NOT touch a Smoke and Carbon Monoxide Alarm that is on fire.

7. Do NOT attempt to operate a Smoke and Carbon Monoxide Alarm that is on fire.

8. Do NOT attempt to rescue anyone from a burning building.

9. Do NOT attempt to operate a Smoke and Carbon Monoxide Alarm that is on fire.

10. Do NOT attempt to operate a Smoke and Carbon Monoxide Alarm that is on fire.

IMPORTANT: Smoke and Carbon Monoxide Alarms should be installed in every room of your home, including bedrooms and bathrooms.

1. Always follow safety warnings and instructions that come with your Smoke and Carbon Monoxide Alarms.

2. Do NOT install this unit over an electrical junction box. Air movement near an electrical junction box may activate the alarm.

3. Keep the Smoke and Carbon Monoxide Alarms away from the bathroom and kitchen exhaust fans.

4. Keep the Smoke and Carbon Monoxide Alarms away from cooking appliances, and fireplaces. Smoke and Carbon Monoxide Alarms are intended for use in homes and mobile homes, not in commercial or industrial buildings.

5. Smoke and Carbon Monoxide Alarms should NOT be used in public buildings, hotels, or schools.

6. Smoke and Carbon Monoxide Alarms should be installed in outdoor areas, such as garages, porches, and patios.

7. Smoke and Carbon Monoxide Alarms should NOT be installed in areas that receive direct sunlight, such as windows or skylights.

8. Smoke and Carbon Monoxide Alarms should be installed in areas that receive strong drafts, such as near doors or windows.

9. Smoke and Carbon Monoxide Alarms should be installed at least 10 feet (3 meters) away from any source of smoke or steam.

10. Smoke and Carbon Monoxide Alarms should be installed at least 6 inches (15.2 centimeters) above the floor and at least 6 inches (15.2 centimeters) below the ceiling.

POTENTIAL SOURCES OF CO IN THE HOME

1. Gas appliances, including gas water heaters, gas furnaces, and gas stoves.

2. Gas-powered generators.

5. Gas-powered water heaters.

POTENTIAL SOURCES OF CO IN THE HOME

1. Gas appliances, including gas water heaters, gas furnaces, and gas stoves.

2. Gas-powered generators.

5. Gas-powered water heaters.

RECOMMENDED LOCATIONS FOR SMOKE ALARMS: Continued

More specifically, install Smoke Alarms:
- On each level of your home, including the basement.
- Outside bedrooms. Additional Smoke Alarms in hallways and outside each separate sleep area meet local building codes.
- In the garage.
- In the kitchen.
- Near fireplaces.
- On porches.
- Near stairwells.
- In or near each separate sleeping area (in the vicinity, entire room, or closest area).

IMPORTANT!

This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference and receives reasonable assurance of operation in the desired environment. This device must not be used in any environment where it is not intended to be used—specifically, where it is vulnerable to electromagnetic interference that may cause unintended operation.

GENERAL LIMITATIONS OF SMOKE/CO ALARMS

This Smoke/CO Alarm is intended for residential use. It is not intended to be used in medical environments, public buildings, or other environments where it is vulnerable to electromagnetic interference that may cause unintended operation. This Smoke/CO Alarm has limitations. It can only detect smoke or CO that reaches the sensors. It may not give early warning of the presence of smoke or CO when the smoke or CO is not flowing or when it is not detected by the sensors. This Smoke/CO Alarm may not work in every situation.

This Smoke/CO Alarm is not a substitute for complete fire protection, including fire extinguishers, fire blankets, fire extinguishing systems, or other smoke detectors. This Smoke/CO Alarm is not intended to protect entire buildings, condominiums, apartments, or hotel rooms.

This Smoke/CO Alarm is not a substitute for life insurance. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.

This Smoke/CO Alarm is not a substitute for fire extinguishers, smoke detectors, or CO detectors. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.

This Smoke/CO Alarm is not a substitute for fire extinguishers, smoke detectors, or CO detectors. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.

This Smoke/CO Alarm is not a substitute for fire extinguishers, smoke detectors, or CO detectors. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.

This Smoke/CO Alarm is not a substitute for fire extinguishers, smoke detectors, or CO detectors. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.

This Smoke/CO Alarm is not a substitute for fire extinguishers, smoke detectors, or CO detectors. This Smoke/CO Alarm is not intended to protect against personal injury or death. This Smoke/CO Alarm is not intended to be used in a relative's home without a legal guardian.
