**INSTALLATION**

**WHERE TO INSTALL THIS ALARM**

This Smoke/CO Alarm is designed to be installed at any level of a residence to provide early warning and to reduce the risk of property loss and injury resulting from fires and carbon monoxide toxic levels. Please use caution when selecting the location of the Smoke and Carbon Monoxide Alarm and keep the following information in mind:

- **Avoid dead air spaces.** Do not install this Smoke/CO Alarm in locations where the end of the Smoke/CO Alarm is not in direct line of sight for the smoke and carbon monoxide sensors. Examples of dead air spaces include under bookshelves, closets, etc. The Smoke/CO Alarm may not detect smoke and carbon monoxide when installed in dead air spaces.

- **Avoid fireplaces.** Do not install this Smoke/CO Alarm within 2 feet of a fireplace or a chimney.

- **Avoid high humidity areas.** Do not install this Smoke/CO Alarm in high humidity areas such as the laundry room, utility room, or other source of high humidity.

- **Avoid near cooking appliances.** Do not install this Smoke/CO Alarm within 5 feet of any cooking appliance. In air streams that flow directly past the Smoke/CO Alarm, there is a risk that carbon monoxide from the cooking appliance may enter the Smoke/CO Alarm, causing it to malfunction.

- **Avoid near windows and doors.** Do not install this Smoke/CO Alarm near windows and doors. When a door or window is opened, smoke or carbon monoxide may escape from the room causing the Smoke/CO Alarm to malfunction.

- **Avoid in the garage or office.** Do not install this Smoke/CO Alarm in the garage or office because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

- **Avoid in areas used to store gasoline, liquid fuels, or other flammable gases.** Do not install this Smoke/CO Alarm in areas used to store gasoline, liquid fuels, or other flammable gases. When these types of gases are burned, they produce carbon monoxide.

**Notes:**
- Do not install this Smoke/CO Alarm directly above walls or bay windows since this may reduce service life of the alarm.
- Do not install this Smoke/CO Alarm in the garage or on the home exterior.
- Do not install this Smoke/CO Alarm on the wall opposite a door, as the door may act as a dead air space.
- Do not install this Smoke/CO Alarm in areas where household appliances are used, as household appliances may generate false alarms.
- Always perform a test to ensure proper operation before installing the Smoke/CO Alarm. If the Smoke/CO Alarm does not operate properly, return it to the manufacturer for repair.

**WARNING:**

- **Avoid near windows or doors.** Do not install this Smoke/CO Alarm near windows or doors because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

- **Avoid in areas used to store gasoline, liquid fuels, or other flammable gases.** Do not install this Smoke/CO Alarm in areas used to store gasoline, liquid fuels, or other flammable gases. When these types of gases are burned, they produce carbon monoxide.

- **Avoid in the garage or office.** Do not install this Smoke/CO Alarm in the garage or office because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

**Regular Maintenance**

- **Check and replace batteries**
- **Clean the Smoke/CO Alarm**
- **Test the Smoke/CO Alarm**
- **Replace the Smoke/CO Alarm**

**Cleaning the Smoke/CO Alarm**

- Use a soft brush attachment. Test the Smoke/CO Alarm. Never use water, steam, or compressed air to clean the Smoke/CO Alarm.

**Replacing the Smoke/CO Alarm**

- If the Smoke/CO Alarm is not operating properly, replace it with a new Smoke/CO Alarm. If the Smoke/CO Alarm is not operating properly, replace it with a new Smoke/CO Alarm. If the Smoke/CO Alarm is not operating properly, replace it with a new Smoke/CO Alarm.

**Test the Smoke/CO Alarm**

- Smoke/CO Alarms should be tested monthly to ensure proper operation. Smoke/CO Alarms should be tested monthly to ensure proper operation. Smoke/CO Alarms should be tested monthly to ensure proper operation.

**Check and Replace Batteries**

- Batteries should be checked and replaced every six months. Batteries should be checked and replaced every six months. Batteries should be checked and replaced every six months.

**WARNING:**

- **Avoid near windows or doors.** Do not install this Smoke/CO Alarm near windows or doors because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

- **Avoid in areas used to store gasoline, liquid fuels, or other flammable gases.** Do not install this Smoke/CO Alarm in areas used to store gasoline, liquid fuels, or other flammable gases. When these types of gases are burned, they produce carbon monoxide.

- **Avoid in the garage or office.** Do not install this Smoke/CO Alarm in the garage or office because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

**WARNING:**

- **Avoid near windows or doors.** Do not install this Smoke/CO Alarm near windows or doors because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

- **Avoid in areas used to store gasoline, liquid fuels, or other flammable gases.** Do not install this Smoke/CO Alarm in areas used to store gasoline, liquid fuels, or other flammable gases. When these types of gases are burned, they produce carbon monoxide.

- **Avoid in the garage or office.** Do not install this Smoke/CO Alarm in the garage or office because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

**WARNING:**

- **Avoid near windows or doors.** Do not install this Smoke/CO Alarm near windows or doors because of the high levels of carbon monoxide that may exist due to the use of lawn mowers, paint sprayers, lawn and garden equipment, and other sources.

- **Avoid in areas used to store gasoline, liquid fuels, or other flammable gases.** Do not install this Smoke/CO Alarm in areas used to store gasoline, liquid fuels, or other flammable gases. When these types of gases are burned, they produce carbon monoxide.
